

## Q4 NEWSLETTER 2024

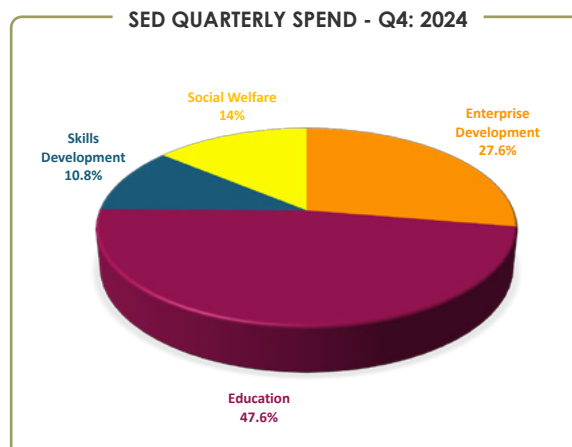

### BOREHOLE HANDED OVER TO LOCAL FARMERS!

We are proud to have handed over a wind-powered borehole with accessories to the Bakgatla Ba Mmakau livestock farmers, addressing the pressing challenge of water scarcity in the Madibeng Local Municipality.

This borehole will provide a reliable water supply for approximately 300 cattle, easing the burden on local farmers. In addition to delivering this essential resource, the project created four temporary jobs during its implementation.

"We are truly grateful to De Wildt Solar for addressing our long-standing water challenges. Access to water for our cattle has been a significant issue, and we deeply appreciate the support and work that has been done to help us," said Mr. Bokaba, Chairperson of the farmers.

### INTERNSHIP PROGRAMME SUCCESS!

We are committed to addressing the skills gap within our beneficiary communities by implementing impactful initiatives such as our Internship Programme. Launched in 2023, the programme aims to transfer knowledge and expertise from seasoned professionals to young individuals, ultimately benefiting the wider community.

One of the programme's key objectives is to facilitate employment opportunities for interns. This goal was met when Gomolemo Mogale, who was part of the 2023 intake, secured permanent employment with another independent power producer. Gomolemo began her new role in November 2024, marking a significant milestone in her career journey.

We wish Gomolemo all the success in her new role.
